**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to a method and apparatus for planarizing a film, classified in class 451, subclass 54.
  - II. Claims 14-22, drawn to a method and apparatus for spraying planarizing particles at a film, classified in class 451, subclass 38.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. Group I planarizes using "rolls, scrapes, grinds or polishes" as set forth in claim 5. Group II uses a nozzle to "blow" particles at the film.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Any inquiry concerning the content of this communication or earlier communications from the examiner should be directed to M. Rachuba whose telephone
